

(55) s. 47

Tämä on todettava ratkaisusse!

Kolmiot ovat yhtäläisyytissä.

$$\frac{x}{5} = \frac{x+20}{15}$$

$$x \cdot 15 = 5(x+20)$$

$$15x = 5x + 100$$

$$15x - 5x = 100$$

$$10x = 100$$

$$x = \frac{100}{10} = \underline{\underline{10}} \text{ (m)}$$

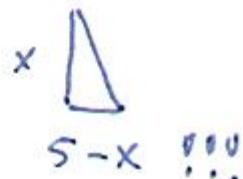

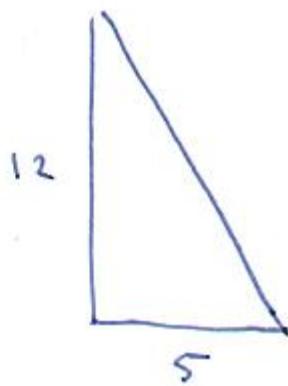

(53) c)

$$k = \frac{\text{Uuden kurvin viiva}}{\text{Vastinviiva alkuperäisessä}}$$

$$k = \frac{5}{3} = \underline{\underline{5 : 3}}$$

(67)

5.49

$$\frac{5}{12} = \frac{5-x}{x}$$

$$\text{joste } x = \frac{60}{17}$$

jne ...

Kahdenmuotoisilla kuviolla s.51

Pinta-alojen suhde on mittakaava toiseen!

$$A_1 \quad | \quad a$$

$$A_2 \quad | \quad b$$

$$\frac{A_2}{A_1} = b^2$$

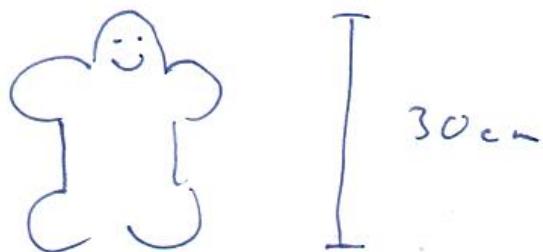

$$\frac{A_2}{A_1} = \left(\frac{b}{a}\right)^2$$

$$\frac{A_1}{A_2} = \left(\frac{a}{b}\right)^2$$

(E)

$$A_1 = 8 \text{ cm}^2$$

$$A_2 = ?$$

$$\frac{A_2}{A_1} = \left(\frac{30}{8}\right)^2 \quad || \cdot A_1$$

$$A_2 = \left(\frac{30}{8}\right)^2 \cdot A_1$$

$$= \left(\frac{30}{8}\right)^2 \cdot 8 \text{ cm}^2$$

$$\approx 112,5 \text{ cm}^2$$

## Kielenmatoisille kappaleille s. 53

Tilavuuden suhde on mittakaava kolmanteen!

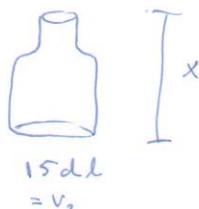

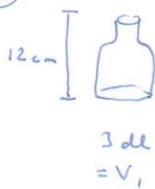

$$\boxed{\frac{V_2}{V_1} = k^3}$$

$$\boxed{\frac{V_2}{V_1} = \left(\frac{b}{a}\right)^3}$$

$$\boxed{\frac{V_1}{V_2} = \left(\frac{a}{b}\right)^3}$$

(E)

$$\frac{V_2}{V_1} = \left(\frac{x}{12}\right)^3$$

$$\frac{15\text{ dl}}{3\text{ dl}} = \left(\frac{x}{12}\right)^3$$

$$\frac{15}{3} = \frac{x^3}{12^3}$$

$$3x^3 = 15 \cdot 12^3$$

$$x^3 = \frac{15 \cdot 12^3}{3}$$

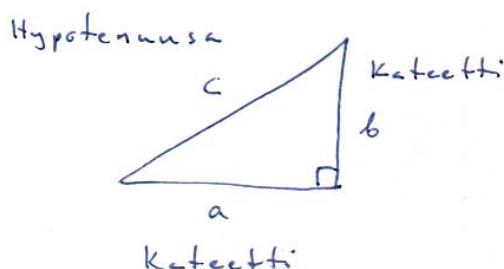

$$x = \sqrt[3]{\frac{15 \cdot 12^3}{3}} \approx \underline{\underline{20,5\text{ (cm)}}}$$

$$\boxed{\left(\frac{a}{b}\right)^n = \frac{a^n}{b^n}}$$

## Pythagorean lause s. 60

Hypotenuusa tisseen = Katetti tisseen + Katetti tisseen

$$c^2 = a^2 + b^2$$

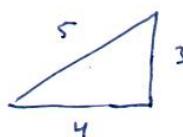

Kolmion on oltava suorakulmainen!

Pisin sivu on "hypotenuusa".

Itseessä: Pythagorean lause trinii myös testintä sille, onko kolmio suorakulmainen vai ei?

(E)

Onko kolmio suorakulmainen?

Pythagoras:

$$3^2 + 4^2 = 5^2$$

$$9 + 16 = 25$$

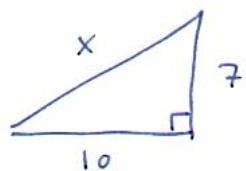

$$25 = 25$$

Tosi

$\Rightarrow$  Kolmio on suorakulmainen.

## Lekut

(E)

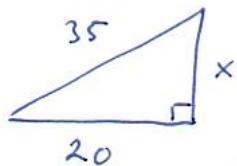

Pythagoras:

$$x^2 = 7^2 + 10^2$$

$$x = \sqrt{7^2 + 10^2} \approx 12,2$$

(E)

Pythagoras:

$$35^2 = x^2 + 20^2$$

$$35^2 - 20^2 = x^2$$

$$x^2 = 35^2 - 20^2$$

$$x = \sqrt{35^2 - 20^2} \approx 28,7$$

Leksy siivulle 62 asti.
